

For Instructors

Scaffolded Discourse Development for Professional Proficiency

B10-PP is an AI-assisted practice platform that structures the morning academic block. Students complete independent listening and speaking practice the night before. You debrief the results each morning across 3–4 class periods. **The afternoon is yours — for your curriculum, your methods, your students.**

THE MORNING BLOCK — 3 to 4 Class Periods

1	CORE Bundle Debrief Students completed two listening paraphrases the night before. You play one strong response, discuss the transcript, connect to the platform score. Repeat for the second passage.	45–50 min
2	Enabling Activity Structured frame practice drawn from the current week's Enabling Activities set. Builds the analytical move from surface to procedural across the week.	45–50 min
3	ESO Debrief Students completed a bundle ESO question and a discourse frames ESO question the night before. Same debrief structure: exemplar, transcript, feedback, score.	45–50 min
4	Linguistic Flexibility Whole-class LF planning session. Students open the week's LF question and scaffold (WFF, SV, SC, or PI) on the platform. Instructor models one move; students plan their response. Students record at home that night alongside their bundle. No in-class recording required. (Mon/Tue/Thu only)	45–50 min

WHAT STUDENTS DO EACH NIGHT

- Two listening paraphrases — listen once, record immediately, no notes
- One extended speaking question tied to the listening domain
- One discourse frames speaking question for the current week's frame
- Platform scores automatically — no instructor action required overnight

WHAT YOU GET

- Real student performance data every morning — scores, transcripts, platform feedback
- A structured debrief anchor that drives class discussion without preparation overhead
- A six-week analytical foundation students carry into your specialized instruction
- Flexibility to augment with your own material, additional platform content, or LF tasks

This is a pilot. Your experience this cycle shapes what B10-PP becomes. Come with questions. Feedback is the point.
